Product Description

Super Slim LED Cabinet Light is widely used in showcases, display case or furniture. This Super Slim LED Cabinet Light is especially applied to hidden/ covert installation. After processed by special optical system, which has patented, this kind of super slim LED cabinet light indeed becomes a continuous / super slim LED cabinet light source. By using connector cable and/or plastic connector, a few lamps can be installed in a row quickly and easily. The super slim LED cabinet light comes in three different sizes (L=300mm/500mm/1000mm)

Feature

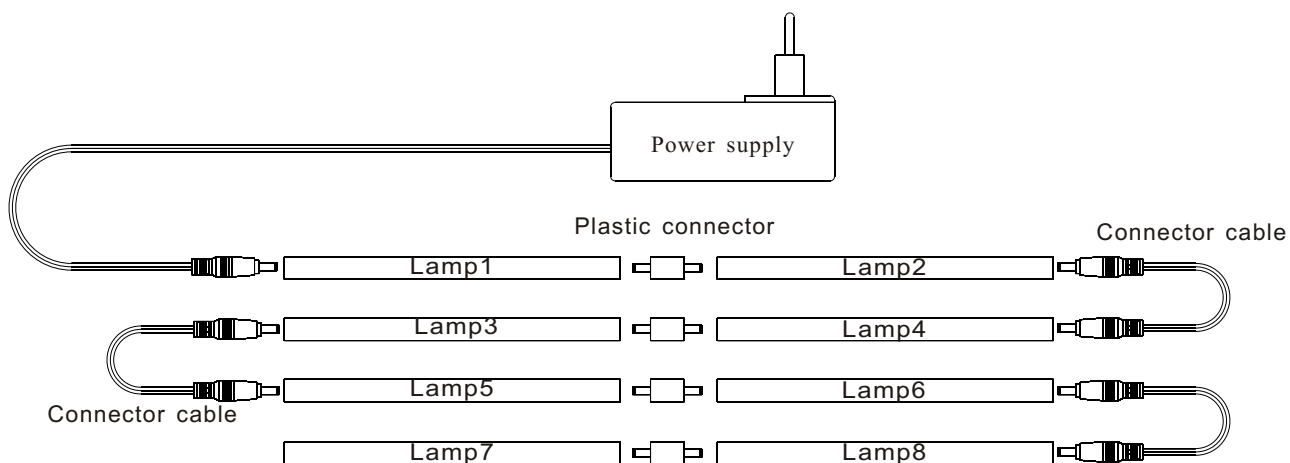

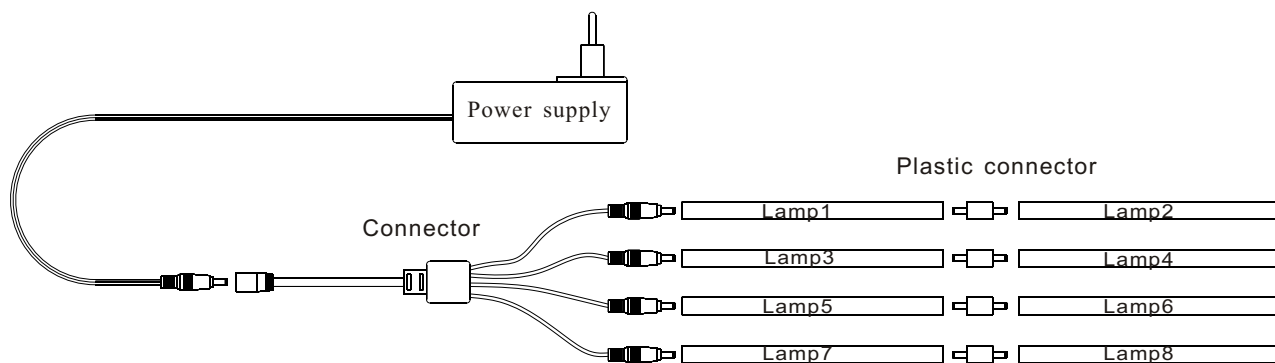

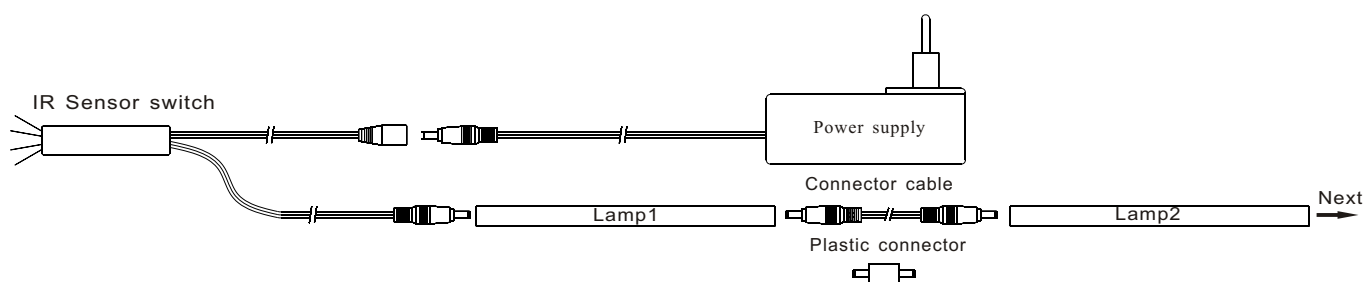

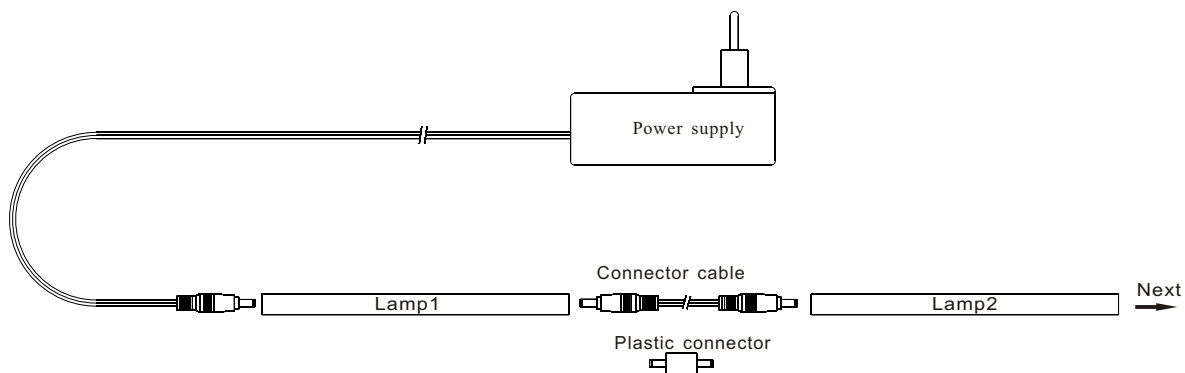

- Energy saving up to 50% compared with traditional fluorescent under the same flux
- Life Span—over 50,000 hours
- Available in cool white, neutral white, and warm white color temperatures; Available in other colors
- Easy linking up to 36 watts per run
- Easy installation
- Low voltage, more safety

Application

- LED show case lighting
- LED shelf lighting
- LED under counter lighting
- LED display case lighting
- LED retail product lighting
- LED furniture lighting
- LED bookcase lighting
- LED wardrode lighting
- LED wine cabinet lighting
- LED under cabinet lighting
- LED kitchen cabinet lighting
- LED cove lighting
- LED accent lighting
- LED task lighting
- LED product line lighting

Specification

- Dimensions: 1000*30*8mm
- Light Source:High brightness SMD3528
- Input Voltage:AC100-240V /DC24V/12V
- Operating Temperature: -20°C to 40°C - Indoors
- Humidity Operating:10%-80%
- Main Materials:Aluminum+PC
- Life span: >30,000 Hours
- IP Code: IP20
- 2 year with proper installation and power supply
- Mounting Clips and M2.6x10 screws make it easy to install
- Certification: CE&RoHs

Packing Data

Dimension	White Box (mm)	Carton (mm)	Units/Carton	NW (kg)	GW (kg)
1000mm	1035*34*12	1065*200*155	50PCS	14. 6	16. 4

Note: Each color box includes 1 lamp, 2 Mounting Clip, 2 M2.6x10 screws, 1 manual.

Power supply usage instruction

The following table shows how many lamps the power supply can drive respectively. You can select suitable power supply according to the power per run.

Power supply	No. Of lamps
12W	1
24W	2
36W	3

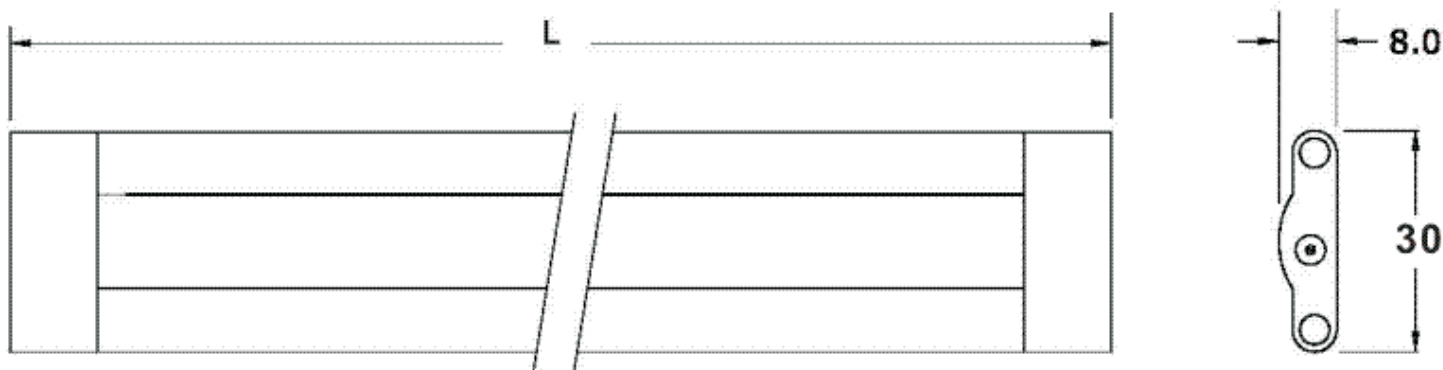

Note: The power supply's power should be over the total power when lamps are linked up.

Safety Information

- 1 Indoor use only
- 2 LED Module incorporates no protection against short circuits, overload or overheating. Therefore it is absolutely necessary to operate the modules with an electronically stabilised power supply offering protection against the above mentioned safety risks. Our power supply is specifically designed with protection features for safe operation. When using power supply other than us, the following basic safety features are required, in addition to any other application specific concerns and local safety codes:

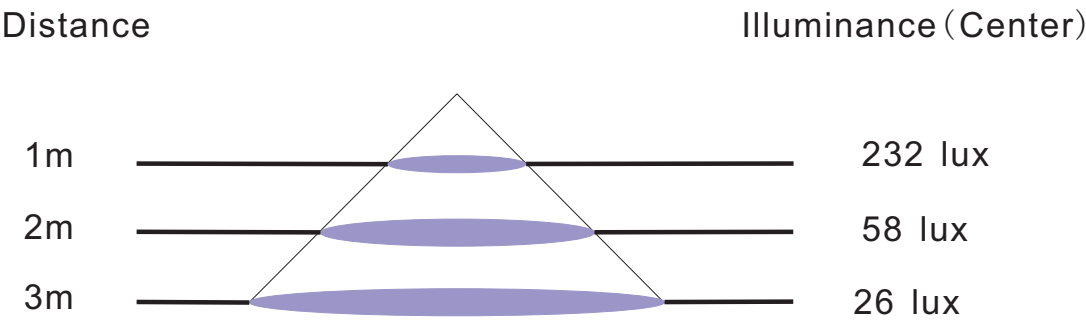

☐ Short circuit protection ☐ Overload protection ☐ Overheat protection

Dimension

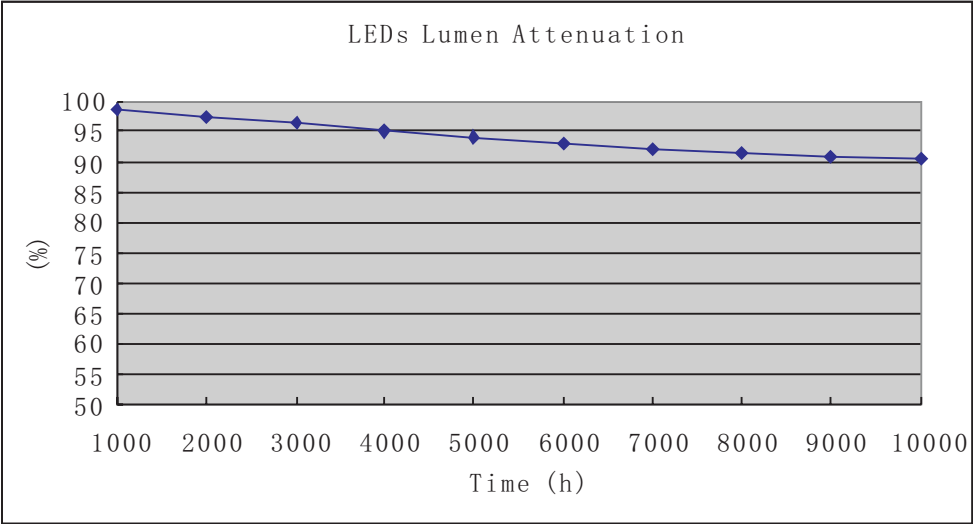

You will need a additional clearance at one or both ends to plug in power cord and/or linking extension(s).

Installation Instruction

Notes

1. Install instruction

- 1) Before installing, firstly please make sure no damage during transportation, don't install it if damaged and contact with your local distributors.
- 2) Keep it away from fire or high temperature objects when using.
- 3) Please don't look directly at LED irradiance surface for a long time, and don't irradiate others' eyes with led reflected beam.

2. Clearance and maintainance

- 1) Please turn off the power before cleaning.
 - 2) It is not allowed to clean lamp by the chemicals or any canker goods.
 - 3) After cleaning lamp, it can be used continuously when it is completely dry.
-
